

# St. Francis High School Watsonville, California

The Ecology Club led the way for St. Francis High School's Zero Waste Week. With the help from local organizations and businesses (Save the Earth, O'Neill Sea Odyssey, the Last Plastic Straw, and Sandbar Solar Company), the week was filled with events, challenges, social media games, and educational presentations. As a real test, the entire school unplugged for a "Zero Energy Day". By turning off all lights, computers, WIFI, and other electronics - students reflected on their dependency as well their ability to do without! To top off the week, St. Francis collaborated with Save the Earth Foundation and held the first EVER Save the Earth video competition. Go to [www.savetheearth.org](http://www.savetheearth.org) to view these inspiring student videos!
